Inspection Date: December 28, 2009

### III. Comments – Inspection Narrative

- *Document the area of the permit inspected*
- *Discuss observations made during the inspection*
- *Document the results of any field tests taken*
- *Provide a summary of any discussions with industry representatives, along with results, and expectations from those discussions*
- *Describe any enforcement action taken during the inspection, along with facts or evidence supporting the enforcement action*

No exploration activity is currently underway at UEC Permit No. 123C. A series of 7 exploration boreholes located on the Arneck 33101 lease was the focus of this inspection. These exploration-drilling locations were previously individually inspected for compliance with the regulations and permit requirements on 9-17-08 and the PVC pipe marking was removed after their inspection. No site restoration problems were noted at the 7 locations inspected. Other than some variation in vegetation and a few traces of cement at some locations, little evidence of exploration activity remains visible as documented in Photos 1-4. In-active logging and cementing equipment was observed parked at the UEC field facility as seen in Photo 5.

Project Name: Weesatche  
 Permit Number: 123C  
 Inspection Date: December 28, 2009

## VI. Photographs

Photo 1: Site restoration at 33101-5 drilling location.
